Other Agile methodologies, JIRA, Jenkins, GIT, Bitbucket, JetBrains
Languages English, French, Arabic

WORK HISTORY

Full stack Developer

April 2023 – Present

Kepler technologies, Algiers, Algeria

As a dedicated Full Stack Developer at Kepler Technologies, my focus spans across the entire spectrum of web development, from creating dynamic user experiences on the front end to ensuring impeccable code quality on the back end. With a specialization in both front-end and back-end development, I seamlessly merge technical finesse with a steadfast dedication to crafting clean and efficient code.

- Collect and document user requirements and develop specifications.
- Drove the creation of captivating web applications by leading development efforts within the PERN stack, utilizing React for creating dynamic user interfaces that engage and delight users.
- Championed the importance of clean code through comprehensive code reviews, offering insightful feedback and best practice recommendations. This practice significantly elevated code quality, fostering a culture of excellence and collaboration.
- Energized training sessions by sharing my passion for front-end development, delivering workshops that empower colleagues with essential skills to create elegant, user-centric interfaces.
- Collaborated closely with cross-functional teams to gather requirements, align on design visions, and consistently deliver outstanding software solutions that exceeded client expectations.
- Advocated for the implementation of agile development methodologies, resulting in streamlined project execution, timely releases, and the agility to adapt to evolving requirements.

Front end Developer

August 2022 – April 2023

Hotello, Montreal, Canada

At Hotello, I had the opportunity to work on large and complex projects using Agile methodology, delivering high-quality solutions within tight deadlines. My expertise in project management, communication, and collaboration enabled me to effectively lead cross-functional teams and ensure successful project outcomes.

- Collect and document user requirements and develop specifications.
- Research, evaluate and synthesize technical information to develop and test software applications.
- Develop data, process, and network models to optimize architecture and evaluate performance and reliability.
- Research and develop reusable npm libraries and angular components.
- Plan and coordinate the development, installation, integration and operation of software applications.
- Lead and coordinate teams of information systems professionals in software development.

Full stack developer

October 2020 – August 2022

Golden corp, Algiers, Algeria

At Golden Corp, I gained valuable experience in project management, team collaboration, and business development while working as part of their startup team.

- Developing the frontend using react and the latest technologies while keeping performance in check.
- Optimize and build new features using react-native.
- Develop intuitive, usable, and engaging interactions and visual designs for mobile.
- Developing features to enhance the user experience.
- Fixing bugs and building new features in the backend using elixir and phoenix.

Front end developer

September 2019 – October 2021

Orcloud, Algiers, Algeria

Orcloud is a young, ambitious development company specializing in website design and implementation

- Collaborate with the project manager to create a brand identity for clients.
- Determining the structure and design of web pages.
- Optimizing web pages for maximum speed and scalability.
- Maintaining brand consistency throughout the design.
- Make sure that the website works properly on all devices (Desktop, Tablet. Phone).

EDUCATION

UHBC, Chlef, Algeria 2011 - 2016

Master of physical education and sports

VOLUNTEERING

Co-Organizer

September 2018 – January 2022

GDG Chlef, Chlef, Algeria

Managed web development workshop series and presented at tech events on Google APIs. Facilitated beginner and intermediate web fundamentals workshops, and delivered engaging presentations on emerging web technologies and best practices.
